UPDATE ON TYPHOON'S PROJECTS IN QUEBEC

Laval, Canada, October 30th 2007 - **Typhoon Exploration Inc. (TSX-V: TOO)** reports on the 2007 exploration work on its projects in Quebec and the recent developments to its shareholders.

FAYOLLE (GOLD): The 2007 drilling campaign program has permitted to better define the lateral extensions to the east and west of the (gold rich) mineralized zone identified in the past on the Fayolle project in Abitibi. The company is currently preparing the assay results compilation from the drillings combined with a 3D Gocad modelization to be announced soon.

MONEXCO (GOLD): Major exploration works including 22 zones of outcrop stripping, trenching, and detailed mapping indicating priority targets on the project. In addition to these works in 2007 a Gocad compilation in 2D permitted to identify the precious metal and base metal zones. For 2008, the company plans to initiate diamond drilling on the project.

OPINACA (GOLD) (URANIUM): In addition to the airborne geophysical survey and the structural study with satellite imagery, a prospecting campaign and surface sampling are completed.

COTE-NORD (URANIUM): The airborne survey and the satellite structural study were conducted. The company plans to initiate a prospecting campaign with spectral scintillometers and sampling on the property shortly.

The best results from the drilling, the sampling and trenching will be announced when available through press release.

Following the last board of directors meeting, it was approved that Mr. Claude Charron, resigned as secretary and CFO, he will act as director on different committees of the Company whereas Mr. Paul Antaki, director, was appointed as the CFO and secretary of the Company.
