- Re-election of Directors proposed by the management. (99,4%)

#### **About Typhoon**

**Typhoon Exploration Inc. has signed an option agreement with Aurizon Mines Ltd. for the development of its Fayolle project, (100%-owned by Typhoon) located in the heart of Abitibi's mining projects. Pursuant to the Agreement, Aurizon has the option to acquire up to a 65% interest in the project Fayolle by incurring total expenditures of \$25 Million and subscribing for common shares of the Corporation, over a three year period, for gross proceeds of \$2 Million.**

**The Fayolle property offers the company the potential to gather important gold resources. A major data compilation of Fayolle (1946-2010) was completed between the months of April 2009 and February 2010 which allowed us to identify a favourable corridor between the Aiguebelle-Goldfields Showing and a large anomaly to the south-east of the Mc Donald Showing. The corridor shows a potential extension of the Fayolle Deposit mineralization on more than 2.5 km east-west by approximately 1.0 km north-south, all while remaining open at depth.**

The company's management foresees that with a rise in gold prices, the 15,000 meter drilling operations currently underway on the Fayolle property will increase the value of its shares. It is noteworthy that the company only has 14,105,876 shares in circulation which are owned by 2,197 investors.

**The common shares of Typhoon Exploration are listed on the Venture Stock Exchange under the symbol «TYP».**
