## TYPHOON INITIATES DEEP DRILLING ON THE FAYOLLE PROJECT

---

Laval, Canada, January 29 2008 – **TYPHOON EXPLORATION INC. (TSX-V: TOO)** reports that it has received the results of a 3D Gocad compilation on all the data available on the Fayolle project produced by *l'Unité de Recherche et de service en technologie minérale de l'Abitibi-Témiscamingue* (URSTM-UQAT) and supervised by Francine Fallara, Geologist, M.SC.A.

Following this compilation Typhoon initiated an aggressive deep drilling campaign on the Fayolle project.

**Typhoon will invest more than one million dollars (\$1,000,000) in order to verify deep targets with diamond drilling.**

These priority targets are similar to the albite and ankerite alteration of the Fayolle showing. The first is located in the north-west sector less than 200 metres from the project Aiguebelle-Goldfields (under option with Agnico-Eagle Mines Ltd [www.agnico-eagle.com](http://www.agnico-eagle.com) see "Typhoon" press release of March 9<sup>th</sup>, 2007 at [www.explorationtyphon.com](http://www.explorationtyphon.com) ) and the second target is in the south-east area about 400 metres east of the drill hole FA-05-15.

M. Robert Gagnon, Geo. (OGQ), a qualified person as defined by National Instrument 43-101, supervised the preparation of the information in this news release.
