TYPHOON REPORTS ITS BEST DRILLING RESULTS SINCE 2004

Laval, Canada, February 20 2008 – **TYPHOON EXPLORATION INC.** («TYPHOON») publishes a review of the best drilling results from 2004 to 2007 on the Fayolle property. This review has for purpose to give the shareholders a better understanding of the Fayolle project as well as its auriferous potential.

In order to shorten the content of this release, the results over 1meter grading 2 G/T Au and more are being published.

The facts to keep in mind are:

- The Fayolle property is 100% owned by Typhoon and covers 26 km² of which 8 km strike on the Destor Porcupine Fault.
- All the results are available on the website at: www.explorationsityphon.com.
- The 2008 drilling campaign is presently undergoing.
- Only 2% of the property has been investigated by diamond drilling to date.
- Several exploration works are planned for 2008 on the properties of Typhoon.

BEST DRILLING RESULTS OF YEAR 2004 - 2007

All the samples from the 2008 drillings are sent to the laboratory for analysis under priority mode.

Typhoon is presently negotiating to move in a second drill on the Fayolle project in order to accelerate the drill program.

The drillings will be pursued throughout the year 2008 on the Fayolle property with the objective to test the lateral and at depth extensions of the Fayolle deposit. Typhoon will also carry on the exploration works on its Monexco Au, Côte-Nord U₃O₈ and Opinaca Au, U₃O₈ properties in the course of the summer 2008.

Mr. Robert Gagnon, P. Geo., a Qualified Person as defined by National instrument 43-101, supervised the preparation of this news release.
