NEW TARGETS DEFINED BY A STRUCTURAL SURVEY ON FAYOLLE

Laval, Canada – April 23, 2008 - Typhoon Exploration Inc. (« **Typhoon** ») announces its most recent targets based on a structural survey conducted by EarthMetrix near the Fayolle Showing owned 100% by Typhoon.

Many targets near the Fayolle Showing reveal interesting structural signatures that might correspond to the target's extensions. The survey shows the Fayolle Showing as a sigmoid meeting two major brittle structures bearing northeast by southwest intersected by north-south faults. Typhoon has obtained its best drilling results by this north-south lineament.

DRILLHOLE	FROM	TO	VALUE

Regionally, this north-south lineament is reputed rich in gold for the Doyon and the ancient Bousquet-2 mines. Presently, Typhoon Exploration is investigating a few of these targets with drilling exploration.

Mr. Robert Gagnon, P. Geo., Technical Advisor, a Qualified Person as defined by National Instrument 43-101, supervised the preparation of the information in this news release.

The common shares of Typhoon Exploration are listed on the Venture Stock Exchange under the symbol «**TOO**».
