TYPHOON OBTAINS 4,26 G/T AU OVER 7,0 METERS AT FAYOLLE

Laval, Canada June 4, 2008 – Typhoon Exploration Inc. (« Typhoon ») confirms the discovery of a new showing at more than 600 meters (1,968 feet) of the drilling hole FA-08-13 which reported 10,84 g/t AU over 19,0 meters (Refer to June 3rd, press release) owned 100% by Typhoon.

The FA-08-15 drill holes intersect two gold mineralization zones 4,26 g/t Au over 7,0 meters and 1,09 G/T over 6,0 meters, while the FA-08-14 drill holes also intersect two gold mineralization zones 1,65 G/T over 5,0 meters and 0,79 G/T over 7,0 meters.

FA-08-14	213.00	214.00	1.00	1.325	

These results are located at more than 450 meters (1,480 feet) of the Fayolle deposit that contains 188 000 ounces of gold in Inferred Resources (Refer to January 19, 2007 press release) and confirm the lateral extensions as well as the vertical depth of the gold mineralization in the eastern area, of the new Mc Donald showing.

Interestingly, both the FA-08-14 and 15 drill holes cross cut two distinct gold mineralization zones deeper than the Fayolle deposit. This shows great promise for the future.

The firm continues its work on the Fayolle property focussing specifically on the eastern area where significant gold mineralization values were obtained with FA-08-09,11,14 and FA-08-15 (Refer to May 20th and 28th 2008 press releases). **Several drilling analysis are presently in progress and will be announced as soon as available.**

Mr. Robert Gagnon, P. Geo., Technical Advisor, a Qualified Person as defined by National Instrument 43-101, supervised the preparation of the information in this news release.
